Restricted Import List
Gaza Strip
2013
INTRODUCTION

Ever since the terrorist organization Hamas took control of the Gaza Strip seven years ago and escalated attacks (rockets, IEDs, sniper, etc.) against residents of southern Israel, materials entering Gaza have been regulated so as to prevent strengthening the terrorist group's capabilities. As of October 2012, the State of Israel has updated and expanded the civil policy regarding imports to the Gaza Strip. The list of restricted materials has been revised and shortened as part of the ongoing Israeli efforts to relax restrictions on civilian goods entering Gaza. Items and materials that remain on the restricted list are all weapons, military materials, and dual-use items.

LIST OF RESTRICTED MATERIALS:

All items not mentioned in this document are free to be imported and exported to and from Gaza. Requests for special authorizations to transfer any of the listed restricted items to Gaza are possible and are coordinated by the Coordination and Liaison Administration (CLA) to Gaza. Dual-use items required for projects, approved by the Palestinian Authority, will be allowed to enter Gaza, subject to supervision by a recognized international organization.

MUNITIONS

Missile equipment and munitions have been strictly forbidden from entering into Gaza as declared in the Defense Export Control Order of 2008.

DUAL-USE GOODS

Restrictions on dual-use items, items which have been designated for civilian use yet can be utilized in military situations are subject to heavy regulation and are listed in appendixes A & B.

THE BOTTOM LINE

The State of Israel's goal is to minimize restrictions of goods allowed to enter into Gaza as much as possible. However the security situation between the State of Israel and the ruling power in Gaza, Hamas, has forced Israel to maintain its restrictions on Gaza imports. Hamas has continuously proven its determination in sabotaging Israeli efforts to loosen restrictions on goods by its continued offensive against Israel.
Appendix A: Controlled Dual Use Items

1. Fertilizers or any mixture containing cholerot potash with concentrations greater than 5%.
2. Fibers or textiles containing carbon (carbon fibers or graphite fibers), including:
   a. Chopped carbon fibers.
   b. Carbon roving.
   c. Carbon strand.
3. Glass fiber-based raw materials, including:
   a. Chopped glass fibers.
   b. Glass roving
   c. Glass strand.
   d. Glass fabric tape.
   e. S-glass.
   f. E-glass.
4. Vessels.
5. Fibers or fabrics featuring polyethylene, also known as Dyneema.
6. Retro detection devices.
7. Gas tanks.
8. Drilling equipment.
9. Equipment for the production of water from drillings.
10. Vinyl ester resins.
11. Epoxy resins.
12. Hardeners for epoxy resins featuring chemical groups of durable or reliable types, including:
   a. DETA – diethylenetriamine.
   b. TETA – thiethylenetramine.
   c. AEP – aminoethylpiperazine.
   d. E-100-ethyleneamine.
   e. Jeffamine T-403.
   f. Catalyst 4.5,6,22,23,105, 140, 145, 150,179,190,240.
   g. D.E.H 20,24,25,26,29,52,58,80,81,82,83,84,85,87.
   h. XZ 92740.00
13. Vinyl ester accelerants, including:
   a. DMA-dimethylaniline.
   b. Cobalt octoate.
   c. MEKP – methylhexyl keyone peroxide.
   d. AAP – acetyl acetone peroxide.
   e. CuHP – cumene hydroperoxide.
14. M or H type HTPB, hydroxyl-terminated polybutadiene.
15. Water disinfection materials – solutions with a concentration of over 11%.
16. TDI - Toluene diisocyanate.
Appendix B: Dual Use Items for Projects

1. Portland cement (bulk or bags or drums).
2. Natural aggregates, quarry aggregates and all foundation materials.
4. Concrete elements and/or precast and/or tensed concrete.
5. Steel elements and/construction products.
6. Concrete for foundations and pillars of any diameter (including welded steel mesh).
7. Steel cables of any thickness.
8. Forms for construction elements of plastic or galvanized steel.
10. Beams from composite materials or plastic with a panel thickness of 4mm and thicker.
11. Thermal insulation materials and/or products excluding roof tiles, plaster/mortar glue, mosaic tiles, building stone/coating stone/exterior stone.
12. Concrete blocks, silicate, Ytong or equivalent (of any thickness).
13. Building sealing materials or products which include Epoxy or polyurethane.
14. Asphalt and its components (bitumen, emulsion) in bulk or in packages of any sort.
15. Steel elements and/or steel working products for construction.
16. Elements and/or products for channeling and drainage from precast concrete with diameters of over 1 meter.
17. Trailers and/or shipping containers.
18. Vehicles except for personal vehicles (not including 4X4 vehicles), including construction vehicles.
